

Doug Paulson serves as the STEM integration specialist for the Minnesota Department of Education, focusing on support for schools integrating standards and other STEM initiatives. Paulson also is the state coordinator for the federal Mathematics and Science Partnerships grant, overseeing the statewide development of modules that focus on science, engineering, and mathematics. Paulson has presented at several national conferences, including the International Technology and Engineering Education Association and the National Science

Teachers Association annual conferences, as well as many state and regional conferences. He was recognized by ASCD in its 2011 class of Emerging Leaders and currently serves on the boards of the Works Museum, AirSpaceMinnesota, and SciMathMN.
